

## SUMMARY

### The sameness of fur processing by local skinnners

*/KVEDARNA*

*Janina Morkūnienė*

*Lithuanian History Institute*

The handicraft technology of leather and fur processing is analyzed: the tools used and the methods of fur processing (preliminary processing of furs carried out by peasants themselves after flaying, fur processing carried out by the artisans). Information about the most famous furriers of the Kvėdarna region is presented.
